The authors regret that in the original version, the y-axes of Figures 5 and 8 were labelled incorrectly. The corrected figures are presented here.

Fig. 5. Counter-ion concentration for (a) single salt experiments in cation exchange membranes CMX and CSE, where NaCl, KCl and CaCl₂ were used in external solutions, and for (b) binary salts experiments in CSE where equimolar mixtures of NaCl + KCl and NaCl + CaCl₂ were used in external solutions. Lines are drawn to guide the eye.

Fig. 8. Counter-ion concentration in anion exchange membranes for (a) single salt experiments in AMX and ASE where NaCl, NaNO₃ and Na₂SO₄ were used in external solutions and for (b) binary salts experiments in ASE where equimolar mixtures of NaCl + NaNO₃ and NaCl + Na₂SO₄ were used in external solutions. Lines are drawn to guide the eye.
