## Correction to: Environmental Science and Pollution Research <https://doi.org/10.1007/s11356-020-09876-w>

Following the publication of the article (Banadkooki et al. 2020) it has come to the authors' attention that Figure 9 should be corrected. In addition, the first panel of Figure 11 has been repeated with the second panel. Therefore, the authors would like to make the following modification: Changing the caption for Figure 9 to “Sensitivity analysis for the data splitting ratio, a) Training Data and b) Testing Data” and replacing the Figure 9 with the new one as shown Figure 1.

Replacing first panel of Fig. 1 with the corrected one as shown herein in Fig. 9. The new panel of Fig. 9 shows the d value for the uncertainty analysis. The required explanations to present the findings from this panel remain unchanged in the original article.

**Publisher's note** Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
