

ASM Victorian Branch

One Health Microbial Genomics Seminar Series (OHMGS)

The aim of this monthly series is to showcase presentations and research in microbial genomics from all aspects of One Health (veterinary, agriculture, human and food) in Victoria. Each session will be online and comprised of 3 or 4 speakers with 12-minute talks and 5 minutes of questions per speaker.

When: Wednesday, 25th May - 4.30pm to 5.30pm
Where: Online Zoom
Cost: Free, Public Webinar

- From bovine to ovine: the udderly fantastic journey of *Streptococcus uberis*
Ben Vezina (Monash University)
- Hidden resistances: How routine whole genome sequencing uncovered an otherwise undetected *bla*NDM-1 gene in *Vibrio alginolyticus* isolated from imported seafood
Jacqueline Morris (University of Melbourne)
- Optimising genomic approaches for identifying vancomycin-resistant *Enterococcus faecium* transmission
Charlie Higgs (University of Melbourne)

Registration: <https://www.trybooking.com/BZQDJ>

Send all questions and enquires to Jake Lacey (jake.lacey@unimelb.edu.au)
Next session to be hosted on Wednesday 29th June - 4.30pm to 5.30pm more details to come soon.
