This issue of *Archival Science* marks two important changes to the editorial team for *Archival Science*.

Professor Elizabeth Yakel is retiring as Editor in Chief. Beth began working with *Archival Science* in 2004, with two of the three founding editors, Eric Ketelaar and Peter Horsman. In the ensuing years, *Archival Science* has attracted contributions from a growing array of international scholars sharing insights and knowledge gained through their research. Guest-edited special issues have been published, allowing for wider and deeper presentation of research in their topic.

We wish Beth well in her continuing career and thank her for her service to the interdisciplinary community who have contributed to *Archival Science*; for her commitment to intellectual rigor and high publication standards. Although we bid her farewell from her role in our team of three Editors in Chief, we are very pleased that she has agreed to join the Editorial Board, where *Archival Science* will continue to benefit from her knowledge of scholars and scholarship in the discipline.

And now we welcome Dr Fiorella Foscarini, who has joined us as Editor in Chief. Fiorella is an Associate Professor in the Faculty of Information at the University of Toronto. She brings extensive experience as an archivist, researcher, and archival educator, as well as editorial experience from her work with other international journals in the field of archives and records. With the addition of Fiorella to the editorial team we are confident that *Archival Science* will continue its leading role in publishing the very best of archival scholarship from around the world.
