

Low Liang Ee
Monash University
School of Engineering

Dear Low Liang Ee,

Congratulations on your achievement!

It is with great pleasure that I write to commend you on your success as an educator of CHE2873 - Introduction to Chemical Processes during the Semester 1 2023 teaching period. The results of the Early Semester Student Feedback Survey (ESSFS) for the aforementioned unit shows a 95% average agreement rate with a response rate of 53%.

The ESSFS is part of a campus-wide effort to collect actionable feedback that could help educators make meaningful and timely improvements in their classrooms. The survey instrument is designed to measure aspects of the learning experience that the research tells us have a significant impact on student outcomes.

Your remarkable results reflect the very real impact that your efforts are having on your students' learning experience. On a campus level, this achievement is an important contribution to the meeting of our targets in the Campus Education Plan and further demonstrates your commitment to excellence in education at Monash University Malaysia.

I sincerely thank you for your incredible work this semester and hope that you share your knowledge and experience with our colleagues where opportunities arise.

Yours sincerely,

Professor Beverley J Webster
Vice-President (Education)
Monash University Malaysia
