

Assoc Professor. Matthew Butler
Department of Human Centred Computing
Email: Matthew.Butler@monash.edu

Biography

Matthew is an Associate Professor within the Faculty of Information Technology at Monash University. His research focuses on the use of emerging technologies such as 3D printing and low-cost electronics to produce accessible materials for the blind and low vision community. His current projects include the use of 3D printing for the provision of accessible graphical content for learning and orientation & mobility, as well as investigating how 3D printing can be used to create more inclusive experiences in art galleries.
