

Dr. Caddie Gao  
Department of Human Centred Computing  
**Email:** Caddie.Gao@monash.edu

## **Biography**

Dr Caddie Gao is a decision scientist working at the intersection of business and information systems. A focus of her research is to examine decision support technologies and their impact on addressing organisational challenges. Her latest research focuses on applying behavioural economics (BE) in understanding human decision-making, and designing, developing, and evaluating business analytics/intelligence systems to support and improve human decision-making processes and decision outcomes. Another research area she is currently working on is to devise behavioural interventions to change human behaviour in a predictable way with the explicit goal of improving a decision-making process. The research methodologies involved in her research include design science, qualitative and quantitative research methods.
