Biography

Geoff Webb is a leading data scientist and AI researcher and the only Australian to have been Program Committee Chair of the two leading Data Mining conferences, *ACM SIGKDD* and *IEEE ICDM*. He was elevated to *IEEE Fellow* in 2015 and his numerous awards include the inaugural *Eureka Prize for Excellence in Data Science* (2017).

He was editor in chief of *Data Mining and Knowledge Discovery* from 2005 to 2014. He is a Technical Advisor to *BigML Inc*, who have incorporated his best of class association discovery software, *Magnum Opus*, as a core component of their cloud-based Machine Learning service. He developed many of the key mechanisms of support-confidence association discovery in the 1980s. His OPUS search algorithm remains the state-of-the-art in rule search. He pioneered multiple research areas as diverse as black-box user modelling, interactive data analytics and statistically-sound pattern discovery. He has developed many useful machine learning algorithms that are widely deployed.
