Biography

Chung-Hsing Yeh graduated from the National Cheng Kung University, Taiwan with a Bachelor of Science (Engineering) (top grade) and a Master of Management Science (topping the class). After graduation, he took up a number of appointments in Taiwan's public and private sectors, including teaching officer at Army Engineering School (military service), assistant engineer at Nan Ya Plastic Corporation, research fellow at Transportation Planning Board, and senior operations officer at Yangming Marine Transport Corporation. He passed Taiwan's national higher examinations in general management and in water transport management.

He joined Monash University to undertake research in computer based production scheduling and completed his PhD study in record time with the best result possible. His research in the development of manufacturing management software systems has yielded a number of key algorithms which incorporate Just-in-Time concepts to achieve practical, effective production scheduling. He has taken up a number of academic positions at Monash, including research assistant, tutor, lecturer, senior lecturer, and associate professor.

His research activities at Monash have been extended to include consulting services to governments and industries in Australia, China and Taiwan. In particular, he has appeared in the Federal Court of Australia as an expert witness for a legal case on software intellectual property. He has been undertaking collaborative research projects at the National Cheng Kung University (where he holds a visiting professor position), funded by the National Science Council (now Ministry of Science and Technology) of Taiwan. He has published extensively in the areas of multicriteria decision analysis, applied artificial intelligence, information processing, operations and production management, and transport research. He has been a regular reviewer for a number of highly regarded scholarly journals. He is listed in Marquis Who's Who in the World, Who's Who in Finance and Industry, and Who's Who in Science and Engineering.
